MOHAMMAD QASEM JARADAT

Junior .NET Developer | ASP.NET Core Developer | Junior Backend Developer

Irbid, Jordan | mjaradat702@email.com | +962-789494049
LinkedIn: linkedin.com/in/moe-q-jaradat | GitHub: github.com/Moe-jar

PROFESSIONAL SUMMARY

Junior .NET Developer with hands-on experience building web APIs and full-stack applications using C#, ASP.NET Core, SQL Server, and Entity Framework Core. Skilled in RESTful API development, JWT authentication, Clean Architecture, CQRS, and software engineering best practices. Strong problem-solving abilities with practical project experience and availability for full-time employment.

TECHNICAL SKILLS

Programming Languages: C#

Backend Development: ASP.NET Core, .NET, RESTful APIs, JWT, Entity Framework Core, N-Tier & Clean Architecture, CQRS, MediatR

Databases: SQL Server, T-SQL

Web Technologies: HTML, CSS, JavaScript

Software Engineering: Object-Oriented Programming (OOP), Data Structures & Algorithms, Problem Solving, SOLID Principles, ORMs, Database Design, Software Development Lifecycle

Tools & Platforms: Visual Studio, Visual Studio Code, SSMS, Git, GitHub

PROJECT EXPERIENCE

Freelancer Portfolio Platform

Technologies: *ASP.NET Core, C#, SQL Server, Entity Framework Core, JWT, CQRS, MediatR, Clean Architecture, HTML, CSS, JavaScript*

- Developed a full-stack Freelancer Portfolio application using ASP.NET Core and C#.
- Implemented Clean Architecture and CQRS with MediatR for clear separation of concerns and maintainable application flow.
- Designed and consumed RESTful APIs secured with JWT authentication and authorization.
- Utilized Entity Framework Core for data access, including migrations, model definition, and efficient CRUD operations.
- Created a responsive user interface for portfolio, skills, and contact modules.
- Developing an interactive “Try Demo” feature to allow clients to simulate uploaded projects prior to engagement.

Poems API

Technologies: *ASP.NET Core, C#, SQL Server, RESTful Web API, Layered Architecture*

GitHub: github.com/Moe-jar/SofismBoemsAPIs

- Built a RESTful Web API using ASP.NET Core with a layered architecture (API, Business Logic, Data Access).
- Implemented comprehensive CRUD endpoints using standard HTTP methods and JSON responses.
- Emphasized separation of concerns and scalability in API design.

DVLD System

Technologies: *C#, .NET Framework, ADO.NET, SQL Server, Three-Tier Architecture*
GitHub: github.com/Moe-jar/DVLD-System

- Developed a full-stack desktop application simulating a Department of Vehicle Licensing system.
- Utilized ADO.NET and SQL Server for robust data management and three-tier architecture for modularity.
- Designed clear module workflows and improved usability for operational efficiency.

Supermarket Management System

Technologies: *C#, .NET Framework, ADO.NET, SQL Server, Three-Tier Architecture*
GitHub: github.com/Moe-jar/Supermarket

- Designed and developed a desktop application for managing invoices, products, and sellers.
- Ensured data integrity and clean separation of concerns through a three-tier architecture.
- Applied practical software development practices to deliver a functional and maintainable system.

EDUCATION

Jordan University of Science and Technology (JUST)
Computer Science | 2022 – 2026 (Paused)

- Completed 90 credit hours toward a Bachelor's degree in Computer Science.
- Available for full-time employment.

CERTIFICATIONS & COURSES

ProgrammingAdvices.com: Completed over 30 courses covering fundamental to advanced programming topics.

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Upper-Intermediate)

Soft Skills: Problem Solving, Self-Learning & Adaptability, Attention to Detail, Time Management, Communication, Teamwork
